NYS Office of Children and Family Services - Child Fatality Report

Report Type: Child Deceased
Age: 1 month(s)

Jurisdiction: Suffolk
Gender: Male

Date of Death: 11/27/2014
Initial Date OCFS Notified: 12/03/2014

Presenting Information

A report was made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) on 11/27/2014, which alleged Inadequate Guardianship, and DOA/Fatality against the mother and the father on behalf of the one-month-old male subject child. This report alleged the subject child was fed at 4:30 AM, and was placed back to sleep on the bed next to the father. At approximately 10:00 AM, the father checked on the subject child and noted him to be cold, so he covered the subject child with a blanket. It was noted that at 12:00 PM, the parents again checked on the subject child and observed he was non-responsive. The report stated that the parents did not call 911, and instead dressed the subject child, put him in his car seat and drove him to the hospital. The subject child was noted to have a low temperature indicating that he had been dead for some time. No visible signs of trauma were noted.

Executive Summary

Suffolk County Department of Social Services, (SCDSS), conducted an investigation into the allegations, and coordinated their investigation with law enforcement. Appropriate collateral contacts were made, and pertinent information was obtained. SCDSS contacted medical professionals, family members and community resources for services for the family. All assessments as well as the Risk Assessment Profile (RAP) were appropriate, timely, and accurately reflected the known circumstances of the case.

On 01/23/2015, SCDSS made the determination to un-substantiate the allegations listed on the report. The basis for the determination was "Allegation of DOA/Fatality and Inadequate Guardianship are Unsubstantiated as it could not be shown that the physical, mental, emotional condition of child was placed at risk of impairment by their actions." The documented notes in the current system of record indicate SCDSS obtained enough information throughout the course of the investigation to make the appropriate determination.

Pediatric records indicated no concerns in regard to the subject child, nor the surviving sibling. The Medical Examiner noted no visible signs of trauma, no evidence of natural disease, and explained there is no evidence to suggest the father was on top of the subject child. The Medical Examiner also noted nothing suspicious surrounding the subject child's death. A final autopsy was not completed at the time of the case closure as lab results for the subject child had not been received. The Local Law Enforcement agency had no concerns of "foul play," and indicated the subject child's death appeared to be accidental.

Bereavement counseling and voluntary preventive services were offered to the family, however declined as the family was engaged in on-going services via a community resource. SCDSS offered to provide financial aid for the child's funeral, however, the family declined these services. Safe sleeping practices were discussed with the immediate and extended family.

The Office of Children and Family Services reviewed the SCDSS CPS case record and found the investigation complied with applicable statutory and regulatory requirements.
